

RUGGEDIZED HANDHELD PROGRAMMER

Ruggedized Handheld Programmer

The easiest way to remotely control transmitters and receivers without a bulky computer or monitor

- **Controls Transmitters and Receivers**
Facilitates set up without a desktop computer using a preinstalled Quasonix utility
- **Intuitive Touch Screen Interface**
Operates transmitters and receivers with a simple tap
- **Automatic Detection of a Connected Device**
Detects 2nd and 3rd Generation Quasonix transmitters and receivers
- **Basic and Advanced Menus**
Accesses all of the basic and advanced parameters enabled on the connected transmitter or receiver
- **Save and Load Presets**
Uses software presets created via the handheld programmer or imported from other transmitters or receivers
- **Custom Menu Option**
Allows menu set up with parameters used most often
- **Terminal Menu**
Provides access to basic and advanced terminal commands without an attached computer or monitor
- **Includes International Power Adapter, Rechargeable Li-ion Battery, USB Cable, and Stylus; Built-in RS-232 Serial Port**
